

**MODEL: RUM lite mini  
RAIL CAR UNLOADER**

Introducing the RUM lite mini from Ashross. This version of our rail car unloading system is the extra-lite version of the RUMig3 that has been around for over 15 years. Many project's requirements for unloading rail cars do not need all the "bells and whistles" that the RUMig3 has like the Allen Bradley PLC or other systems to unload at a rapid rate. So we took all of the "extras" off of the RUMig3 and left only what is required to unload a rail car one gate at a time. This 20-foot-long piece of equipment has a hopper type feed system that will handle almost anything that you put in the hopper area. With most materials you will be able to unload rail cars at your desired rate on the 40-foot-long by 60 inch wide conveyor belt standard on the RUM lite mini.

**MODEL: RUM lite mini  
RAIL CAR UNLOADER**

**SPECIFICATIONS:**

**LENGTH: 20 ft.**

**WIDTH: 14 ft.**

**DEPTH: 4'-6" From top of rail**

**ELECTRIC POWER FOR BELT- Single 75 HP Motor/Gearbox combo**

**BELT WIDTH-36 inches to 60 inches**

**BELT SPEED-Using the Gearbox ratios it will go from 100FPM-300FPM**

**HOPPER TYPE FEED SYSTEM**

**ADJUSTABLE FEED/STRIKE OFF GATE SYSTEM**

**CONVEYOR LENGTH: 40 ft. STANDARD**

**CONVEYOR LENGTH AVAILABLE FROM 20 to 100 ft.**

**1 year LIMITED WARRANTY ON PARTS AND LABOR**

**Call 801-785-6464 or 801-376-9298 for more information.**
