

# Traditional Pit Unloading Systems

At Ashross, we understand that sometimes you want to stick with what you know. That's why **we now offer full-service options for traditional pit rail car unloading systems.**

Our packages include:

- Engineered drive-over section with rails
- Pan feeder
- Conveyor from the pit
- Electrical systems
- Complete drawings and installation instructions

Because every project and site is unique, we'll provide tailored options with pricing. Systems will be available with discharge conveyors ranging from 42 inches to 60 inches.

We're currently finalizing these full-service packages so you won't have to source components separately—we'll manufacture everything you need in one place.

Check back soon to see the full range of packages available. When you think of rail car unloading systems, think Ashross.

**For questions, contact Todd Bergeson at 801-376-9298.**
