

MODEL: RC RECLAIMER

Introducing the Ashross-RC (material reclaim system), an innovative machine designed to recover stacked material and move it on a belt to other belts or storage systems.

The Ashross RC's unique design allows easy cleaning while creating a large "live load" utilizing reciprocating plates. The 30' x 14' deck acts as a lid on a concrete box having a depth of 5'-0". Its structural strength supports stacked material 50' high as well as the weight of typical material moving vehicles. When the deck is cleared of materials the moving plates may be lifted for cleaning and maintenance. The reclaimer handles coal, coke, pet-coke fertilizers, sulfur prills, agriculture products, and most aggregates.

SPECIFICATIONS:

- LENGTH: 30 ft.
- WIDTH: 14 ft.
- DEPTH: 5'-0"
- ELECTRIC POWER FOR BELT
- ELECTRIC POWER OVER HYDRAULIC FOR PLATES
- BELT WIDTH-60 inches
- BELT SPEED-variable (vfd controlled)
- 10' X 10' SLIDING PLATE FEED SYSTEM
- ADJUSTABLE FEED GATE SYSTEM
- CONVEYOR LENGTH: 40 ft. STANDARD
AVAILABLE FROM 20 to 100 ft.
- 6 MONTH LIMITED WARRANTY ON PARTS AND LABOR
